DFC 169-X D5

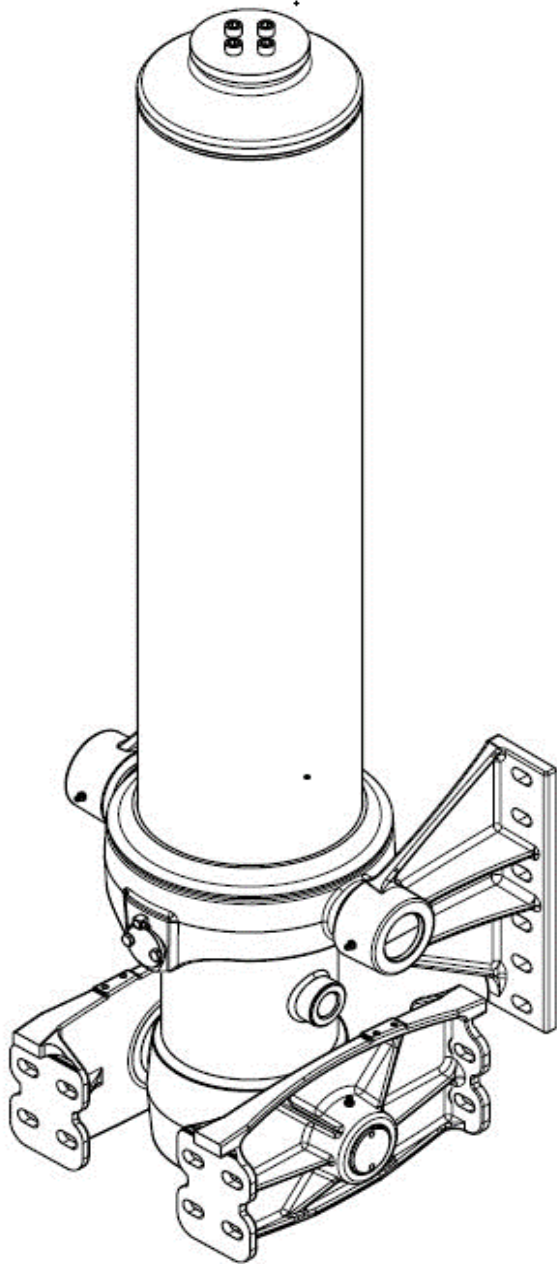

Replacing older D4 cylinder with newer D5

When a D4 cylinder is needed as a spare part, a newer version D5 can be delivered with new D5 lower brackets.

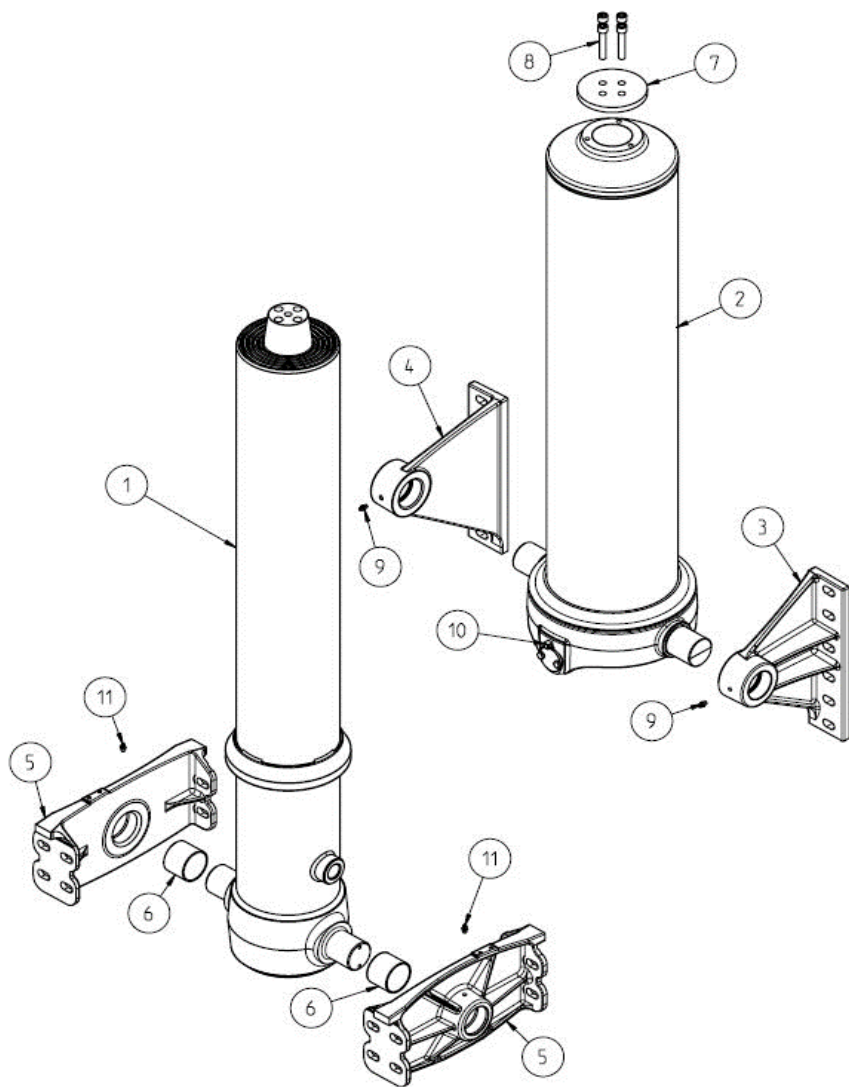

There will be a few changes as a consequence:

- Cylinder pull out (free play) will be increased by 18 mm, thus stroke will be 18 mm shorter.
- Oil port will be moved 10 mm upwards.
- Support ring for cover tube will be moved 60 mm upwards. After 18 mm extra pull out, the effective difference will be 42 mm -> 42 mm more overlap with the D4 cover tube.
